SUMMARY

Recent Computer Science graduate and full-stack developer with production experience across the MERN stack, Next.js, and Python. Currently leads a CRM and Agentic AI department, building LLM-integrated automation (OpenAI, Gemini, OpenRouter, Nvidia open-source models) and voice agent workflows with n8n and GoHighLevel. Built CodeSprint, an AI-powered competitive programming and learning platform, as Final Year Project. Comfortable owning a feature from database design through deployment.

EDUCATION

Sir Syed University of Engineering and Technology, Karachi <i>Bachelor of Science in Computer Science CGPA: 3.26/4.0</i>	2022 - 2026
Govt. Degree Science & Commerce College <i>Intermediate</i>	Jun 2020 - Jun 2022

WORK EXPERIENCE

Team Lead, CRM & Agentic AI Department — EditVista Ltd • Lead a department building intelligent agentic workflows, CRM integrations, and large-scale operational automation. • Built 50+ production automations using n8n and GoHighLevel (GHL), cutting manual work across CRM pipelines. • Direct voice agent projects, integrating LLM APIs (OpenAI, Gemini, OpenRouter, Nvidia open-source models) into live automation workflows.	Mar 2026 - Present
Agentic AI & Automation Intern — EditVista Ltd • Designed and prototyped intelligent agentic systems, integrating LLMs to automate high-friction business processes.	Jan 2026 - Feb 2026
AI-Enhanced Web Development Intern — Nexium • Built and maintained full-stack web applications using Next.js, Tailwind CSS, and Supabase to streamline end-user workflows. • Designed secure, scalable authentication and database architecture with Supabase and MongoDB for reliable production use. • Integrated third-party APIs and automated backend workflows, reducing manual intervention and enabling rapid scaling.	Jul 2025 - Aug 2025

FEATURED PROJECT — FINAL YEAR PROJECT

CodeSprint — AI-Powered Competitive Programming & Learning Platform • Built with Next.js, NestJS, PostgreSQL (NeonDB), Judge0 CE for code execution, Google Gemini API, BullMQ, and Socket.IO for real-time features. • Designed system architecture, database schema, and UML diagrams for the Technical Requirements Document as part of a 4-person team under faculty supervision. • Used as the pitch for a National Idea Bank IV startup application; selected as a finalist at the ASPIRE Pakistan Startup Hub.

OTHER PROJECTS

- AI Resume Tailor** — AI-powered ATS resume optimization tool built with Next.js 16, TypeScript, and the Google Gemini API; parses candidate resumes and aligns keywords, experience, and metrics with job descriptions, with formatted PDF export via jsPDF.
- NexiumQuotes AI Engine** — AI-powered quote engine using the Google Gemini API and Next.js; filters live-generated content by user-selected topic/category, with a curated fallback dataset when no live match is found.
- Nexium Summarizer** — Full-stack blog summarization platform enabling persistent AI summary retrieval; stores raw article content in MongoDB and AI-generated summaries with relational metadata in Supabase.
- Task Manager Dashboard** — Full-stack task tracker with PHP session authentication and MySQL prepared statements, eliminating SQL injection vulnerabilities.

CERTIFICATIONS

- LAMP Stack Developer — People's Information Technology Programme
- Git/GitHub Masterclass — ACM SSUET

TECHNICAL SKILLS

Languages & Frameworks: TypeScript, JavaScript, HTML/CSS, PHP, Python (NumPy, Pandas, Matplotlib, Scikit-learn, Jupyter), ReactJS, Next.js, Node.js, Tailwind CSS

Databases: MongoDB, PostgreSQL, MySQL, Supabase

DevOps & Cloud: Docker, CI/CD Pipelines, Azure, Vercel/Netlify, Git/GitHub

AI & Automation: OpenAI/Gemini/OpenRouter/Nvidia LLM API Integration, n8n, GoHighLevel (GHL), Judge0 CE

Dev Tools: Cursor, GitHub Copilot
